Forms Printer

Transactional Reporting Integration for Dynamics GP

Email with Modern Authentication in GP2018 and 18.X

Why Forms Printer?

- **Integration**

  expands the boundaries of report design to **SQL Reporting Services and Crystal Reports**, so you can now include ISV application data, meet complex reporting needs and even provide custom report processing.

- **Delivery Capabilities**

  enable predefined setups for Modern Authenticated Emailing in Exchange EWS, SMTP and Outlook, electronic archiving in a variety of formats.

- **Flexible Options**

  allow for a fast, simple setup that will have you up and running in minutes.

- **Powerful Features**

  meet the most sophisticated needs allowing for per report format, company, customer, or vendor setup options.

Flexible Delivery and Setup Options

- Reports can be automatically Emailed as attachments and archived in a variety of formats including PDF.

- Report Templates get you up and running fast

- Using Forms Printer means no more Report Writer complexity or limitations and less maintenance. Accomplish better reporting results in a few simple designs rather than the hundreds of reports that you are maintaining in Report Writer.

- Setup options in Forms Printer allow each Customer or Vendor to have their own print setup including unique reports for each Customer or Vendor.

Complete Integration

Forms Printer has a complete integration to many Dynamics Forms and includes SSRS and Crystal Reports examples for each:

- SOP Quotes, Orders, Invoices, Returns, Backorders, Packing Slips, Picking Tickets, and Fulfillment Orders

- Purchase Orders

- RM Documents & Statements

- Payroll & Payables Checks

- PM EFT and Check Remittances

- Invoicing Documents

- Manufacturing QA NSR & SCAR

- Project Accounting Invoices

- Payroll Checks and Earnings Statements
