

Overview

AnyView Explorer was originally released for version 4 of Solomon and was supported through version 7.X of Dynamics SL. Now, with the release of Dynamics SL 2011, AnyView Explorer customers will upgrade to the renamed and redesigned *INQUIRY* for Dynamics SL. This document is intended as a comparison of Accountable Software's AnyView Explorer and *INQUIRY* for Dynamics SL products.

General Product Statement

INQUIRY for Dynamics SL takes the concept of the AnyView Explorer and expands upon its concepts, improves its features and amplifies its benefits. Newly designed and written in the latest tool sets, *INQUIRY* for Dynamics SL offers even greater functionality in its ad-hoc querying capability, provides improved performance in the execution of queries, and simplifies the process of designing reports.
